Research Interests

My research focuses on algebraic geometry and representation theory. More specifically, I am interested in moduli spaces and moduli stacks of Higgs bundles and bundles with connections. Recently, I am also interested in character varieties.

Projects

- (With Prof. Roman Fedorov) Motivic classes of stacks in finite characteristic and applications to stacks of Higgs bundles and bundles with connections.
- (With Dr. Rahul Singh) Explicit formulae of mixed Hodge polynomials for character varieties of free abelian groups.
- (With Dr. Rahul Singh) Motivic classes of character varieties and character stacks.
